Total Records

Overall dataset total

Total number of records in the dataset.

Finance

₹15.44M

Total BTC-USD Price

Overall dataset total

Total financial value calculated from BTC-USD Price.

Finance

₹6.47K

Average BTC-USD Price

Average dataset value

Average financial value calculated from BTC-USD Price.

Finance

₹61.24K

Maximum BTC-USD Price

Highest observed value

Maximum financial value found in BTC-USD Price.

Finance

₹178.10

Minimum BTC-USD Price

 Lowest observed value

Minimum financial value found in BTC-USD Price.

Finance

₹580.19K

Total ETH-USD Price

 Overall dataset total

Total financial value calculated from ETH-USD Price.

Finance

₹281.51

Average ETH-USD Price

 Average dataset value

Average financial value calculated from ETH-USD Price.

Finance

₹1.98K

Maximum ETH-USD Price

 Highest observed value

Maximum financial value found in ETH-USD Price.

Finance

₹0.43

Minimum ETH-USD Price

↓ Lowest observed value

Minimum financial value found in ETH-USD Price.

Finance

₹121.41K

Total LTC-USD Price

Overall dataset total

Total financial value calculated from LTC-USD Price.

Finance

₹50.91

Average LTC-USD Price

Yellow triangle Average dataset value

Average financial value calculated from LTC-USD Price.

Finance

₹358.34

Maximum LTC-USD Price

↑ Highest observed value

Maximum financial value found in LTC-USD Price.

₹1.16

Minimum LTC-USD Price

↓ Lowest observed value

Minimum financial value found in LTC-USD Price.

AI ANALYTICS

[Refresh Insights](#)

AI Business Insights

Intelligent insights and recommendations generated from your dataset.

Business Insights

What your data is telling you

1

AI INSIGHT

Dataset contains 10,000 records.

2

AI INSIGHT

Dataset contains 24 unique customers.

3

AI INSIGHT

Dataset contains 3,696 missing values (1.76% of all cells).

4

AI INSIGHT

No duplicate rows were detected.

Recommendations

Suggested actions based on your data

1

💡 AI RECOMMENDATION

Review and handle missing values before predictive analytics.

2

💡 AI RECOMMENDATION

Use price volatility, trend and average-price analysis for deeper asset performance evaluation.

3

💡 AI RECOMMENDATION

Analyze sales trends, top-performing products and revenue contribution to identify growth opportunities.

4

💡 AI RECOMMENDATION

Perform customer segmentation and customer-value analysis to identify high-value customers.

5

💡 AI RECOMMENDATION

Monitor profit, expenses and margins to identify financial improvement areas.

Advanced Analytics

Automated statistical analysis, trends, correlations and anomaly detection.
